My name is Albert Sarren, I am residing in Unalakleet, Alaska, and have been for many years. I am in support of having our roads paved, given the opportunity, to keep the dust under control, which would benefit residents that suffer from asthma. It would also help keep the dust off of our fish we dry in our fish racks. Other benefits from having paved roads would be no more mud during rainy seasons, no more potholes around town, and no more damaged mail, from mail dropping off the trucks, that bounce off the trucks after hitting potholes. Thank you for your time in reading my comments!!!

Sincerely,  
Albert Sarren
